

# CERTIFICATE OF APPRECIATION

Presented to

**Seyed Mohammadreza Hashemi**

In recognition of your invaluable contributions to CS50x Tehran

**We extend our deepest appreciation for your steadfast dedication and exceptional support in the educational journey of our CS50 students.**

The mission of CS50 is to make computer science accessible and engaging for everyone, especially as more than two-thirds of our learners are exploring computer science for the first time. Your invaluable contributions have helped transform this mission into reality. By guiding students through troubleshooting sessions, developing a Telegram bot to simplify access to course materials, and translating essential resources into Farsi, you have profoundly enriched the learning experience, making CS50 not only a course but an inclusive and supportive community for all.

Your commitment has not only eased the path for countless students but also fostered an inclusive environment where learners from all backgrounds can thrive in computer science.

**Thank you for your remarkable service and steadfast dedication to the CS50 community.**
